WEAR VOLUME 173, NUMBERS 1–2, APRIL 1994

Contents

The dynamic analysis of stick–slip motion 1
C. Gao, D. Kuhlmann-Wilsdorf and D.D. Makel (Charlottesville, VA, USA)

Friction behaviour of TiN, CrN and (TiAl)N coatings 13
Z.P. Huang, Y. Sun and T. Bell (Birmingham, UK)

Dry sliding wear and friction: laser-treated ductile iron 21
S.P. Gadag and M.N. Srinivasan (Bangalore, India)

A new strategy combining *backward inference* with *forward inference* in monitoring and diagnosing techniques for hydrodynamic bearing–rotor systems 31
Z. You-Yun and X. You-Bai (Xian, China)

The plane transient contact problem for rough sliding bodies with wear and heat generation 39
A.A. Yevtushenki and V.J. Pauk (Luiv, Ukraine)

Mathematical and chemical description of friction of diffusive phosphorized iron 51
J. Nowacki (Łódź, Poland)

The design of an impact abrasion testing machine 59
D. Zhang, P.R. Beeley and A.J. Baker (Leeds, UK)

Wear simulation of a sliding system by means of large-scale specimen testing 65
P. De Baets (Gent, Belgium)

A study of the surface deformations in press and shrink fitted assemblies 75
B. Ramamoorthy and V. Radhakrishnan (Madras, India)

A simplified solution to the combined squeeze–sliding lubrication problem 85
R. Larsson and J. Lundberg (Luleå, Sweden)

Abrasive wear of alumina fibre-reinforced aluminium 95
N. Axén, A. Alahelisten and S. Jacobson (Uppsala, Sweden)

The role of hard second phases in the mild oxidational wear mechanism of high-speed steel-based materials. 105
M. Vardavoulias (Evry, France)

Wear of tillage tools coated by thermoplastic coatings. 115
W.Y. Ali and F.M.H. Ezzat (El-Minia, Egypt)

Wear processes in high-strength sintered alloys under dry rolling–sliding 121
A. Molinari and G. Straffelini (Trento, Italy)

The influence of ion-implanted Mo on the tribological behavior of iron lubricated with oil containing antiwear additives 129
D.H. Yang, Q.J. Xue, X.S. Zhang, H.Q. Wang (Lanzhou, China), W.L. Lin and X.J. Ding (Beijing, China)

Correlating tool wear, tool life, surface roughness and tool vibration in finish turning with coated carbide tools. . . . 137
M.E.R. Bonifácio and A.E. Diniz (Campinas, Brazil)

The enhancement of wear life and moisture resistance of sputtered MoS_2 films by metal ion implantation 145
H. Liu, X. Zhang, D. Yu and X. Wang (Lanzhou, China)

Effects of lubricant compressibility on the film thickness in EHL line and circular contacts. 151
C.H. Venner and J. Bos (Enschede, Netherlands)

A study of the tribological properties of S-(1H-benzotriazol-1-yl)- methyl, 0,0′-dialkyldithiophosphates as additives in liquid paraffin. 167
T. Ren, Q. Xue and H. Wang (Lanzhou, China)

Experimental investigation of overall machining performance with overall progressive tool wear at different tool faces 171
X.D. Fang (Wollongong, NSW, Australia)

Fretting fatigue in electrical transmission lines 179
Z.R. Zhou, A. Cardou, M. Fiset and S. Goudreau (Laval, Que., Canada)

Elsevier Sequoia

Fretting in orthopaedic implants: a review. 189
D.W. Hoeppner and V. Chandrasekaran (Salt Lake City, UT, USA)

Bearing misalignment effects on the hydrostatic and hydrodynamic behaviour of gears in fixed clearance end plates 199
E. Koç (Adana, Turkey)

Phosphate ester surface treatment for reduced wear and corrosion protection. 207
D.G. Placek and S.G. Shankwalkar (Princeton, NJ, USA)
